CONTENTS

No. 1, February 1986

PAGE

B. A. Osborne & J. A. Raven. Light absorption by plants and its implications for photosynthesis 1

P. G. Hepper. Kin recognition: functions and mechanisms 63

Forthcoming Reviews 95

No. 2, May 1986

J. S. Pointer. The cortical magnification factor and photopic vision . . 97

K. J. McNamara. The role of heterochrony in the evolution of Cambrian trilobites 121

F. H. Bronson & E. F. Rissman. The biology of puberty 157

Forthcoming Reviews 197

No. 3, August 1986

J. Priddle, I. Hawes, J. C. Ellis-Evans & T. J. Smith. Antarctic aquatic ecosystems as habitats for phytoplankton 199

Richard A. Dixon. The phytoalexin response: elicitation, signalling and control of host gene expression 239

Forthcoming Review 293

No. 4, November 1986

A. W. F. Edwards. Are Mendel's results really too close? 295

C. A. Finn. Implantation, menstruation and inflammation 313

A. M. Holehan & B. J. Merry. The experimental manipulation of ageing by diet 329

I. M. Johnstone. Plant invasion windows: a time-based classification of invasion potential 369

M. A. Jervis & N. A. C. Kidd. Host-feeding strategies of hymenopteran parasitoids. 395

D. E. Hathway. Herbicide selectivity 435

Forthcoming Reviews 487
